Using any available resources (official Git documentation, online tutorials, or the built-in git --help command), research the following topics and create a personalized 1-page (A4) cheat sheet:

1. Basic Linux commands (command, sample usage) (at least 10)
2. Basic Git commands (command, sample usage, description (use your own wordings), common options/flags

git init	git restore
git status	git branch
git add	git checkout / git switch
git commit	git merge
git log	git tag
git diff	git clone

3. the three-tree architecture of Git

You are free to use any design or color scheme, just make sure it is readable.

Submission:

1. Use PDF as the file format for your cheat sheet.
2. Upload it to your GitHub repository
3. Submit the link here: <https://drive.google.com/drive/folders/1-Y6e6E6PoLyGgB0WZ8prRCNfolpV3cj0?usp=sharing>

Reminders:

Please put a “Reference” section in the cheat sheet for the materials you cited.

I **do not prohibit** the use of AI for this activity, but please declare the extent of the use.

Sample:

“The author used [Tool Name, Version] to [specific task] during assignment preparation. The author reviewed and edited the content as needed and takes full responsibility for the final content of the work.”

Or

"I have not used any AI or AI-assisted technologies to prepare this work."
